

DEKAGRAM

The Dekagram is a lightweight, 10-spoke design that is developed with flow forming technology that offers benefits for both track and street use. Motorsport inspired, the Dekagram's spoke profile design lends to efficient brake cooling as well as exceptional brake caliper clearance. With widths up to 10.5" wide, toughening up the stance on many popular vehicles isn't a problem. With any wheel Konig develops with Flow Forming Technology, the end result is stronger, lighter and offers greater elongation and shock resistance than a traditional cast design. The Dekagram is offered in 15×7.5, 15×8, 15×10, 16×8, 17×8, 17×9, 18×8.5, 18×9.5, 18×10, 19×8.5, 19×9.5 and 19×10.5 and finished in Semi Matte Black and Gloss Bronze (for select part numbers).

Features:

- 4-Lug
- 5-Lug
- Lightweight
- Low Offsets
- Flow Formed
