

FREEFORM

The Freeform is a lightweight, 10-spoke design that is developed with flow forming technology that offers benefits for both track and street use. Motorsport inspired, the Freeform's spoke profile design lends to efficient brake cooling as well as exceptional brake caliper clearance. With widths up to 10.5" wide, toughening up the stance on many popular vehicles isn't a problem. With any wheel Konig develops with Flow Forming Technology, the end result is stronger, lighter and offers greater elongation and shock resistance when compared to a traditional cast design. The Freeform is offered in 15×7.5, 15×8, 15×9.5, 17×8, 17×9, 18×8.5, 18×9, 18×9.5, 18×10.5, 19×8.5, 19×9.5 and 19×10.5 and finished in Radium Bronze and Matte Silver.

Features:

- 4-Lug
- 5-Lug
- Lightweight
- Low Offsets
- Flow Formed
- Back Cut
