

# HEXAFORM

The Hexaform is a 6-spoke design built with flow-forming technology. TWO spoke profiles are available (A & B). Shown is A profile. Available in a NEW! Gloss White, Matte Bronze and Matte Black finishes! We've integrated feedback from our motosport teams, racer and drivers in to both of our new designs this year. We've pushed the face out and allowed for as much brake caliper protrusion as well as overall brake diameter near the drop center. This provides excellent caliper clearance for big brake car and aftermarket big brake kits. The Hexaform is available in 15×7.5, 15×8, 15×9, 17×8, 17×9, 17×9.5, 18×8.5, 18×9, 18×9.5, 18×10b and 18×10.5b

## Features:

- 4-Lug
- 5-Lug
- Lightweight
- Low Offsets
- Flow Formed
