

OMNIA

Early in 2014, the engineers at OZ Tech Lab were tasked with an ambitious project: to design and create, in Italy, a wheel that would meet OZ standards in design, technology and quality, but at a competitive price.

Omnia - the OZ wheel for everyone - required long hours and hard work to optimized production and engineering processes. Best choice for drivers who enjoy the exclusivity of compact sports cars like the Class-A Mercedes, VW Golf and many more, Omnia are 100% made in Italy, and the key that unlocks all the performance values of the world of OZ. Thanks to the engineering quality and attention to detail that went into its production, OMNIA takes its place as a full-fledged member of the SPORT collection, complete with the racing DNA, top construction technologies, and the highest qualitative standards (certified and approved) typical of all OZ wheels.

Product Details

Model	Monoblock
Design	9 spokes
Production process	Low pressure casting process + Heat Treatment
Material	Al Si 7 Mg
Characteristics	  
Certifications	   
Offset range	29 - 50
Width range	7.5 - 8
Holes	5
Diameter available	17" and 18"
