Material:

Main Feature:

Performance Indicator

The traditional 5-spoke design emphasizes straight-line stability at high speeds and stability when turning.

Product Detail

Disc Design

The powerful spokes and overall balance of the wheel make the design look bigger, and it promises to be the best match for recent vehicle designs that combine complex elements have a lot of volume.

Spoke Design

Pursuing the beauty of a more three-dimensional quarter view by paying attention to details such as the treatment of the outer flange and spoke shoulders.

Concave Face

Adopted a concave face that realizes powerful styling. Face type R realizes a deeper dynamic concave.
