Colour: Dark Silver, Matte Dark Gunmetallic

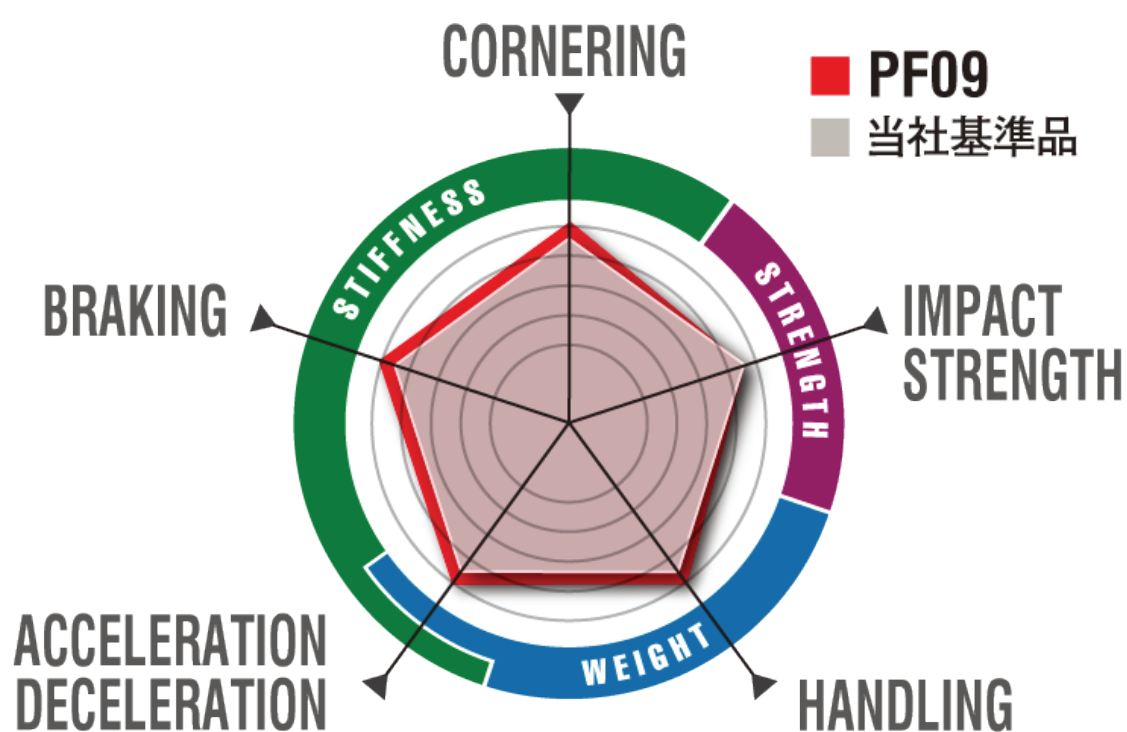

Material:

Main Feature:

Performance Indicator

A model that is effectively lightweight while ensuring the rigidity and strength required for sports wheels. Exhilarating acceleration and deceleration and reliable handling.

Product Detail

Detailed Designing to the End

Attention to design details. Pursuing a 9-spoke design based on the concept of lightweight and performance required for sports wheels. The spoke design which was guided by making full use of the latest CAE analysis has meticulous attention to detail.

Spoke Design:

The spoke, which are formed by trimming off excess flesh, draw a beautiful bend curve from the spoke end, and are sharp and powerful at the same time. The details which consist of curves and functions, give various impressions depending on the viewing angle

Concave Face

The face type R adopts a deeper concave design that enables powerful styling combined with a clever spoke design.
