Main Feature:

Performance Indicator

“Weight”, “Rigidity” and “Strength” are balanced at a high level. The lightweight design realizes comfortable acceleration and deceleration and a comfortable ride.

Product Detail

Y-Shaped Long Spoke

A simple Y-shaped spoke that eliminates meaningless decorations. Lightweight and high rigidity are achieved by evenly supporting the entire circumference of the rim with spokes.

Flat Center Cap

Adopt trendy flat center cap. It is simple yet asserts its presence.

What is ENKEI “BORTEX MII”?

Developed in 1999 with the concept of “wheels suitable for cars that adults can enjoy”. The “Y-shaped mesh design”, which harmonizes design and functionality at a high level, boasted high popularity among sophisticated users.
