

# ADVAN APEX™ V601

*The Pinnacle Of Performance*

High Grip

High Speed

Silence

## MAXIMUM GRIP

### COMPOUND AND TREAD DESIGN

High-grade micro silica in a wide outside rib block devoid of lateral grooves, creates near seamless contact with the road for maximum cornering performance.

### 3+1 CIRCUMFERENTIAL GROOVES

Three inside grooves enhance wet performance while a narrow outside groove dissipates heat generated by high lateral loads for optimal dry performance.

## PRECISION HANDLING

### SOLID CENTER RIB

Uninterrupted center rib enhances high speed stability.

## EXTENDED TREAD LIFE

### ROUNDED RIB DESIGN

Micro-silica compound and rounded ribs profile optimize contact pressure with the road to reduce uneven wear.

## QUIET RIDE

### TREAD DESIGN

Optimized groove angles minimize road noise for more comfortable, quiet ride.
